

FRC Team 2489: The Insomniacs

We are the Fremont FIRST Robotics Competition Team 2489 (*The Insomniacs*). We won first place at the Sacramento Regional, and we are now moving on to World Championships in St. Louis! (April 24-27)

There is a \$5000 registration fee to participate in World Championships. Our team does not have sufficient funds, but we still want to attend. It would be an amazing experience for all of us. We appreciate any amount you could contribute to help cover this cost.

There are many benefits to being a sponsor, namely publicity on team t-shirts, sweatshirts, banner, and robot, all of which will be seen by over hundreds of thousands of people at the international competition. And, you help more than 40 students per year in learning and applying STEM.

This year's challenge is *Ultimate Ascent*, a modified form of Ultimate Frisbee. The competition is organized in a 3v3 format, and we were alliance captain for the winning alliance. This means we won first place out of 53 teams. Videos of our robot from the regional can be found on our YouTube channel, **frcteam2489**. Please check out our photos at www.bit.ly/photosteam2489.

We have another competition before World Championships, the Silicon Valley Regional (April 4-6) at San Jose State University. We would love to have employees from your company attend the regional to see our robot as well as the competition.

We would be happy to give a presentation to your company and demonstrate the bot. Please visit our website at **www.team2489.org**, which has more details on being a sponsor, as well as a PayPal button for online donations. If you are interested in supporting the team, or would like more information, contact us at **info@team2489.org**.

Sincerely,

The Insomniacs
